

# PRIVACY GLASS / DECORATIVE GLASS

## COMPANY PROFILE

### DREAM GLASS, SPAIN

MEMBER OF INTERCOMET GROUP

Dream Glass is an innovative glass company specialized in laminated glass who's products are divided into 2 categories:

#### Intelligent Glass / Privacy Glass:

- DreamGlass®, an innovative laminated glass that at the touch of a switch, changes its state from transparent to opaque granting instant privacy. DreamGlass® usage is endless: residences, businesses, advertising and more. It's main function is to separate or divide spaces and ambiances, granting instant privacy. It can be applied for both Internal use (glass divisions, doors, floors, automatic or manual sliding doors and more), and External use (Building facades). It's exterior use is possible with Double Glazing Units.
- DreamScreen®, provides you with the possibility to adapt our product as a high resolution LCD screen. The advantage of DreamScreen® is that it permits you to place your projector and relevant equipment behind the screen (retro projection). The possibilities of a screen that permits different levels of transparency and projection are endless.

#### Decorative Glass:

- VitroTone®, laminated glass with a color film that can be transparent, translucent or opaque. This is a useful product for interior, and some for exterior decoration to embellish your home, office or place of leisure.
- VitroStyle®, laminated decorative glass with a variety of designs including textiles, wood, and paper. Textile and paper glass provides a highly decorative panel in various standard sizes. In addition, we can laminate a client's own textile.
- VitroMarble®, represents a collection of laminated or single glass with the appearance of marble in a wide scale of colors and types of stone.

VitroTone®, VitroStyle® and VitroMarble® allow clients to decorate interiors or exteriors by imitating materials like colored glass, wood or marble, leaving behind maintenance problems.

Dream Glass products offer new and stylish ways to look at glass.
